### **Corps Security and Viseum UK join forces to provide the ultimate surveillance service**

**12<sup>th</sup> October 2011 ...** As part of its ongoing commitment to working with best-in-class CCTV solutions providers, Corps Security has announced a strategic partnership with Viseum. This mutually beneficial alliance provides customers with a CCTV surveillance solution that combines intelligent automated cameras, with the country's most advanced remote monitoring service.

Viseum's Intelligent Moving Camera (IMC) solution utilises multiple fixed and moving surveillance cameras in a single unit that can cover open spaces as large as 14 football pitches. It detects activity in all directions at the same time, automatically controls a pan, tilt, zoom (PTZ) camera, captures high quality close-up and wide contextual view video evidence, and automatically produces it for prompt investigation. Providing both permanent and temporary deployment options, Viseum offers a versatile plug-and-play modular camera installation. It is also cost effective as it reduces wiring and eliminates the need to spend time adjusting camera positions.

Stuart Thompson, Viseum's managing director, explained, 'Operating completely independently of central command, the Viseum IMC provides full visibility and control of an entire area using just one single unit instead of what used to be a minimum of five or six separate PTZ camera installations.'

Corps Security will integrate Viseum's operating software into its state-of-the art Corps Monitoring Centre (CMC), based in Glasgow. The CMC provides third party alarm receiving and CCTV monitoring services to a wide range of customers across

many market sectors. Having been recently developed at a cost of £1.5m it is widely acknowledged as the leading facility of its kind in the UK.

By targeting specific market sectors the two organisations will not only be able to provide a flexible 24/7 monitoring solution, but also offer the world's most vigilant response service. The construction industry, council facilities, hospital car parks and utilities such as water treatment plants and electricity sub-stations all stand to benefit from this offering.

Eric Roberts, Corps Security's CMC business development director, concluded, 'Having been aware of Viseum's innovative product offering for some time, I'm delighted that we have been able to form a strategic partnership. The combination of pioneering technology and our leading remote CCTV monitoring service takes the combating of crime and anti-social behaviour to a whole new level.'

*In order to give potential customers an opportunity to see the Viseum IMC in action, Corps Security will be hosting an open day in January at the CMC in Glasgow. To find out more call Corps Security's CMC on 0141 847 2043 or visit [www.corpssecurity.co.uk](http://www.corpssecurity.co.uk); or call Viseum on 01322 405724, E: [press.office@viseum.co.uk](mailto:press.office@viseum.co.uk) or visit [www.viseum.co.uk](http://www.viseum.co.uk)*

## **Notes to editors:**

### **Corps Security**

Corps Security uses its focused, specialist expertise to ensure the security, safety and well-being of many of the UK's leading businesses and organisations.

Established 152 years ago, Corps Security is one of the oldest and best respected commercial suppliers of security services, offering a wide range of specialist security services which cover every aspect of threat reduction and business protection.

Originally established to provide gainful employment for injured ex-servicemen returning from the Crimean War, this ethos of caring for ex-soldiers, sailors and airmen continues today, with a high percentage of the company's workforce having previously served within the armed forces. This unique history sets Corps Security apart from mainstream security providers. However, it is the company's modern and innovative approach to service design and delivery which has seen it grow to become recognised today as a market leader in the UK.
